

Disclaimer

This written Food Safety Management System ("The System") is not an "out-of-the-box perfect fit" for your organization, but it is a great start. The System is an educational and informational resource designed to guide you in creating, organizing and documenting the complexity of control processes within your manufacturing operation. The System is created for those that manufacture food in low risk processing facilities (not for medium or high risk processing.) It is also designed for use by second or third food processors. This System is not for use in slaughter and meat processing, seafood processing of any kind or farm, harvest and packing facilities.

The System is not a substitute for working with a professional food safety consultant or other food safety professionals. We cannot guarantee the outcome of following the recommendations provided and any statements made regarding the potential outcome are expressions of opinion only. We make no guarantees about the information and recommendations provided herein. We make no guarantees that the content of The System of Food Safety & Quality programs by itself, when complete, will satisfy any or all considerations of any GFSI Food Safety Audit. A fundamental understanding of food safety and quality controls is a prerequisite to the use of The System. By continuing to read, use and implement The System, you acknowledge that we cannot guarantee any particular results; as such outcomes are based on subjective factors that are not within our control. By accessing and using the System, you are not automatically in compliance with recommended Food

Safety Practices and Regulations. We cannot guarantee that if you implement The System, you will be in compliance with food safety guidelines, be eligible to be food safety certified, reduce your risk of failing a food safety audit or lower your liability in the event that you are involved in a food safety incident. Nothing in the System is a recommendation to adopt a specific food safety plan. Therefore, following any information or recommendations provided in the System are at your own risk. If you need business advice, you should hire a food safety consultant or other food safety professional.

Our Intellectual Property
